

12th Congress of the Balkan Geophysical Society

GEOPHYSICS FOR THE BETTER WORLD

- The 1st Announcement -

Hotel *Kraljevi čardaci*, Kopaonik Mt., Serbia
May 27-31, 2024

INVITATION

Members of the Organizing Committee of the 12th Congress and Technical Exhibition of the Balkan Geophysical Society (BGS) *Geophysics for the better world* send a warm welcome to the world geophysical community and cordially invite you to participate in the event which is held on May, 27-31, 2024, at the *Kraljevi čardaci* Hotel, Kopaonik mt., Serbia.

The event is organized by *Association of Geophysicists and Environmentalists of Serbia (AGES)* and *SEG/SPE Student Section* of the Technical Faculty *Mihajlo Pupin*, University of Novi Sad, Zrenjanin, Serbia. We have support of traditional partners: EAGE (European Association of Geoscientists & Engineers), Ministry of Science, Technological Development and Innovation of the Republic of Serbia and Serbia Convention Bureau, as well as local partners: Hotel *Kraljevi Čardaci Spa*, Kopaonik National Park, Tourist Organization Raška and Ski Resorts of Serbia.

Balkan Geophysical Society (BGS) is a non-profit organization established by the geophysical societies in the countries of the Balkan Region and neighbouring countries (Albania, Bulgaria, Greece, Hungary, Romania, Serbia and Turkey), in order to promote collaboration and mutual assistance between geophysicists from the BGS Member Countries, teaching of Geophysics and R&D in the Universities and Institutions, but also networking and friendship among our members. BGS cooperates with the Member National Geophysical Societies/Unions/Committees, with the international organizations such as EAGE, EAPG, SEG, SPE, UNESCO, etc., as well as with Geophysical Societies in other countries, whose activities could help in the fulfillment of the goals of BGS. BGS is open to other Balkan and neighboring Countries, which can act either like full or associate member.

BGS Congress is organized every third year, at the end of one country member presidency. The 1st Congress of BGS was held in Athens, in 1996, and the last one till now, the 11th, was organized in Bucharest, in 2021, but in virtual form.

In May 2009, during Serbian presidency, the 5th BGS Congress and Technical Exhibition *Geophysics at the Cross-Roads* was organized by AGES and co-organized with EAGE, EnerG and SEG in Belgrade. Almost 250 geophysicists (professionals and students) from Balkans and the world participated in the event. Beside the world known geophysicists and representatives of EnerG, EAGE, SEG and IUGS, special guest was Director of UNESCO-BRESCIE office. During the three-days *AGES/BGS/ENeRG/UNESCO Side-event Energy, Economy & Environment* at Mečavnik (ethno-village owned by the famous movie director Emir Kusturica), organized just after the Congress in Belgrade, Letter of Interest in R&D cooperation between UNESCO and AGES (on behalf of BGS) related to the CCS in Balkans was signed.

This May, 27-31, the 12th Congress and Technical Exhibition of the Balkan Geophysical Society (BGS) is held in Serbia again, at the *Kraljevi čardaci* Hotel, Kopaonik mt., Serbia. During the Congress, participants will enjoy amazing Kopaonik National Park, the number one ski resort in Serbia during the winter (sometimes the ski season lasts till the end of May!), but also an ideal destination for hiking lovers, and for many other activities which are organized during the spring and summer.

After a decade-long cooperation with the Hotel, AGES members guarantee that with its functional, stylish and well-equipped conference halls in conjunction with the unique professional team, *Kraljevi Čardaci* Hotel is the perfect location for organizing BGS Congress. It is important to note that the Hotel leads the way in sustainability (Ethical partnerships, Eco-Friendly choices, Wellness promotion, Water conservation, Renewable energy, Cutting-Edge Technologies, etc.).

Beside standard topics of the Technical Program, goal of the Organizing Committee is to provide some additional contents. Special message of the event is that, beside professionals, there are three pillars more – students, young professionals and seniors. Only this combination gives the best result. Various pannel discussions and Workshops for students and young professionals are planned, but also the special program – session and exhibition *Pioneers of Geoscience*, dedicated to distinguished colleagues who established Geoscience and Geophysics at Balkan countries.

That is why special program is planned to emphasize the importance of each of them as BGS leaders for sustainable, inclusive and growing future – working together for a positive social change.

All your ideas regarding the Technical Program are very welcome. 12th BGS Congress is the event where All are the hosts and that will be the nice opportunity to present not only the knowledge and experience of Balkan geophysicists to the world, but also the unique energy and hospitality.

All geophysicists (and not only geophysicists) are welcome – please join us to make unforgettable event! *Geophysics for the better world.*

TECHNICAL PROGRAM

- Invited lectures
- Special Lectures
- Interactive Plenary Sessions
- Oral and poster presentations of the papers (professionals and students)
- Crosstalk *Steps towards the world-class geophysics*
- Dedicated session *Pioneers of geoscience in Balkans*
- Special YP lectures
- YP News
- Round table debate: *Oil and gas industry - Yesterday, today and tomorrow*
- Students` networking programmes (Officers and members of EAGE, SEG and/or SPE Student Sections, as well as their Faculty advisors, are invited to participate in the Networking Workshop with annual reports of their sections. After presentation of activities, we organize discussion and brainstorming related to the further joint activities and programs).

Papers will be presented within the following sessions:

- Earth Physics, Geodynamics and Seismology
- Regional Geophysics and Tectonics
- Geophysical Methods
- Exploration Geophysics (Oil & Gas Exploration, Geothermal Exploration, Mines & Coal Exploration)
- Near-Surface, Engineering and Environmental Geophysics
- Hydrogeophysics
- Coastal and Marine Geophysics
- Energy and Resources
- Geo-Hazards, Climate Change & Risk Assessment
- Remote Sensing and UAV Geophysics
- Computing Technology in Geophysics
- Geoscience for Society, Education and Environment

Your **extended abstract** should be in English, just 4 pages long including all figures, tables and references (font is *12pt Times New Roman*). Section Headings are bold and the paragraphs are justified and separated by blank line. Please use the attached template. Final formatting will be made by the publisher. *Notification of acceptance is up to five days after papers submission.*
